

How to use the Cavalog to Browse

- Go to: <http://www.cabrini.edu/Library/default.htm> and click on the second tab across the top, “Cavalog,” to access the Cavalog.
- Enter the topic you’d like to search in the word or phrase search box and click search.
- Depending on the words you searched you will get varying results.
- Evaluate the list of results looking for a particular item that seems like a good match for you or a grouping of books that have similar call numbers that seem well suited to the information you are looking for.
- Because non-fiction books are organized by subject, books on like topics will be near each other on the shelf.
- You can now go to a particular area and browse to find the best book for you.
